

Customized electronic production
that adds **competitive force** to any OEM
requirements for tomorrow's technology

NECAS - the new name of OEM electronic solutions

As an effective producer of outsourced electronic solutions to more and more OEM-customers world wide, Nibe Elektronik Center carried out an international facelift under the new name, NECAS A/S. At the same time, we have developed and implemented new production lines and optimized production flow in a modern new factory, which ultimately meets the demands of high-technologic electronic production aimed at OEM in all branches.

More than 25 years experience as OEM business partner

From steering controls for giant construction machines to luxury loudspeakers in the high quality end. You name it - we make it! NECAS has more than 25 years experience as production partner for leading Danish and European suppliers of products with electronic content. We function at all levels - from semi to finished products - and we match every step in value accumulation from idea to reality.

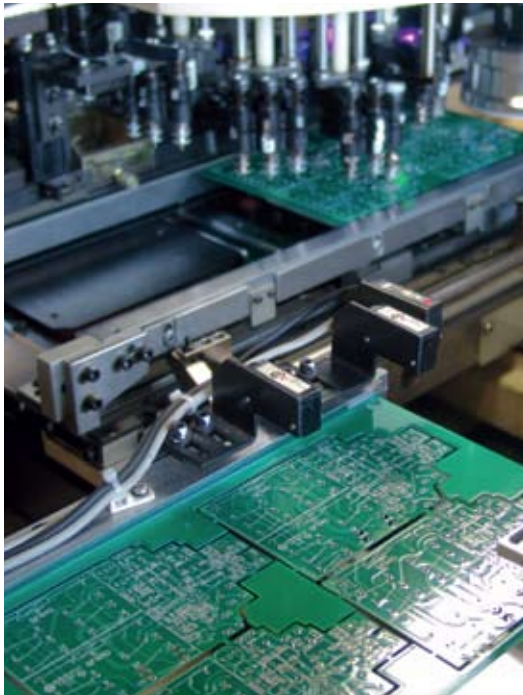

NECAS has no products of its own. We have chosen to concentrate all our effort on standing out as a professional, dynamic and reliable partner with the right flexibility and know-how in technology, process and logistics. We strive after perfectionism from beginning to end and measure our own qualities against our customer's success. The goal is zero defects. Customers expect it - and get it!

Quality Management is the keyword

NECAS is a solid Danish company. We live from going in the forefront with knowledge, technology and unique solutions containing a high level of quality management, commitment and mutual respect in strong and longstanding customer relationships.

NECAS is certified by UL Demco according to ISO9001: 2000. In our daily days, this is clearly demonstrated by constant review of all processes in production, ongoing staff training focus on administrative routines and active sparring - both internally and externally during the whole contract period.

The electronic product palette is, in principle, infinite...

NECAS is dedicated to the manufacture of electronic solutions for OEM customers worldwide and in all industries where know-how, adaptability and security are a must. From simple quality tasks to sophisticated and often complex solutions such as...

- Packaging and dosing equipment in the process industry
- Process monitoring for power/transformer stations
- Controls for medical equipment, medico
- Safety relays for electrical control panels
- Controls for landing light installations at airports
- Height gauges for parachutists
- Metal detectors for slaughterhouses etc.
- Weather-protected electronics for earthmoving machines
- Special solutions for tele and radio communications - onshore/offshore
- Speakers at the high quality end

NECAS is ATEX certified - approved for production of Ex-approved products that operate in areas at risk from explosive atmospheres such as oil rigs, refineries and mines.

NECAS Defence - The new division for defense related electronics

NECAS is also a supplier of electronics for military surveillance and communications equipment. We are members of CenSec network in defense related technology. Including GripenDKteam - the Swedish fighter aircraft project that candidates for a multibillion order for future Air Force fighters.

Geared to meet any OEM requirements for tomorrow's technology

Both standard solutions and more sophisticated, customized special tasks can be handled with our modern production facilities, highly trained team and flexible workflow. The NECAS factory is newly built for a production layout that always makes it possible to match customer specification requirements regardless of job size and complexity. Fitted with the latest technology - and ensured throughw comprehensive safety systems. And added NECAS unique services...

- Extra SMD-line - always open for instant prototyping
- Total production management, including the purchase and storage of components, cables, cabinets, containers, etc.
- Storage-hotel for customer's own components and finished products

NECAS is the new name for electronic solutions that add competitive force to any OEM requirements for tomorrow's technology.

2500 effective m² dedicated to OEM Electronic Solutions. Newly built for a production layout that always makes it possible to match customer-specific requirements. Fitted with the latest technologies and secured through extensive monitoring and safety systems.

The NECAS factory was taken into use on 15/06/09 – conveniently located in Støvring with only a few hundred meters to the E45 motorway.

Customized cooperation - from production maturity to finished product

- Purchasing, storage and logistics
- SMD assembly
- Leaded assembly
- Coating
- Encapsulation (potting)
- Final assembly and test
- Retail packaging
- Dispatch

Trustworthy partnership with advantages...

- Total deliveries of supplies to the retail packaging of appliances, modules, print etc.
- All needs from prototype to series production
- Experience in operating from a forecast
- Stock keeping of raw materials, semi-manufactured products and finished products
- Dedicated prototype SMD line
- Direct communication with sparring on technology and logistics

Documented quality:

- ISO9001: 2000
- ATEX 94/9/EC
- AAA Credit Rating
